Study at Yerevan State Medical University, Armenia

About Yerevan State Medical University

Established in 1920, Yerevan State Medical University (YSMU) is one of the oldest and most prestigious public medical universities in Armenia. With global recognition from WHO, NMC, ECFMG, and IMED, YSMU has built a legacy of excellence in medical education.

The university offers a wide range of programs including MBBS/MD, dentistry, pharmacy, and nursing, all taught in English and aligned with international medical standards. Its reputation for academic quality, international exposure, and research collaborations makes it a top destination for MBBS aspirants.

Why Choose YSMU for MBBS?

Globally recognized by WHO, NMC, ECFMG, and IMED

No entrance exam or donation required

MBBS taught in English with a 1-year clinical internship

Affordable education with annual fees of \$5000

FMGE pass rate of 32.76% (2024)
International collaborations under Erasmus+ projects
Indian mess and food options easily available in Yerevan
Vibrant student life with academic events, seminars, and conferences

Why Study in Armenia?

Armenia is a rising hub for international medical education, offering world-class facilities and affordable living costs. Its universities provide globally accepted MBBS degrees without entrance exams like IELTS/TOEFL, making it ideal for Indian students.

With a friendly local environment, English-medium education, and active Indian student communities, Armenia offers the perfect blend of quality, cost-efficiency, and safety.

Life at Yerevan State Medical University

At YSMU, education extends beyond the classroom. Students are encouraged to participate in international conferences, scientific seminars, and collaborative medical projects.

Host of Erasmus+ SAFEMED+ Project with partners from 6 countries
Hands-on clinical experience in modern hospitals and simulation centers
Student guidance from ICD and career development activities
Access to Indian cuisine, restaurants, and hostels
OSCE training, skill-building workshops, and global networking

In 2023, the Director of ICD joined a key academic event and shared insights on bridging academics with employability, empowering students with the tools for real-world success.
