

Mansoura University

Mansoura University is the sixth oldest higher education institution in Egypt. Its campus covers around 300 acres and is situated on the southwest side of Mansoura city. The faculty members are all highly qualified, holding Ph.D. degrees or higher. These experts excel in both theoretical knowledge and practical skills. Students struggling with any part of their coursework can easily approach these professionals for help. What's remarkable is that every year, faculty members develop innovative teaching methods to help students better grasp their subjects. They continuously adapt strategies that effectively blend theory with practice, enabling students to achieve their academic goals. Among Egyptian universities offering MBBS programs, Mansoura University is considered one of the best.

In 2024, Mansoura University in Egypt hosted a diverse array of events that underscored its commitment to academic excellence, international collaboration, and student development. One of the prominent events was the German-Middle Eastern Forum held in November, organized in cooperation with the German Academic Exchange Service (DAAD). This forum at Mansoura University focused on bridging the gap between scientific research and industry, discussing topics such as artificial intelligence applications in vital sectors and fostering creativity in business models and startups.

Mansoura University also celebrated Global Entrepreneurship Week in November, aiming to strengthen collaboration between scientists and researchers from the Middle East and Germany. The event featured renowned speakers discussing cutting-edge innovations and provided attendees with certified training in entrepreneurship and innovation.

In the realm of student engagement, Mansoura University inaugurated the Student Activities Festival for the academic year 2024-2025 in October. This festival showcased various student activities, including sports, cultural, and scientific events, emphasizing the university's role in building well-rounded individuals prepared for future leadership. The ICD Director expressed his strong support for the initiative and praised for promoting inclusive education and international academic collaboration.
