

# Zagazig University

Zagazig University is one of Egypt's prominent public universities, located in the city of Zagazig. Established in 1974, the university has made significant progress in research, education, and professional training. It boasts a large community of over 7,000 staff members and more than 120,000 students enrolled across 24 academic faculties and institutions.

Zagazig university actively participates in diverse research projects and offers an education system that keeps pace with technological advances and societal needs. It emphasizes logical research to contribute to Egyptian culture and international collaboration, focusing on addressing essential needs and human development.

The Faculty of Medicine at Zagazig University is dedicated to fostering and advancing scientific knowledge and collaboration among doctors, researchers, and other medical professionals. It aims to promote high standards of ethical conduct and cutting-edge research in various medical fields.

In 2024, Zagazig University in Egypt organized a series of significant academic and professional events, reflecting its dedication to fostering innovation, interdisciplinary collaboration, and community engagement. One of the notable events was the IEEE Power & Energy Society (PES) Day, held on May 7, 2024, at the Faculty of Engineering's Basic Sciences Building. This event featured esteemed speakers such as Dr. Hady Fayek, Associate Professor of Electrical Power and Chairman of the IEEE Industrial Electronics Society Egypt Chapter, who discussed the role of sustainability in the future of energy. Additionally, Dr. Menna Abd Elhamid and Dr. Omar Ramzy from Heliopolis University for Sustainable Development explored topics at the intersection of sustainability and entrepreneurship, emphasizing how business can be a force for good.

In the medical field, Zagazig University hosted the Annual Conference of the Neurosurgery Department, known as Neuro-Zag 2024, on January 17–18. This conference brought together neurosurgeons, researchers, and medical professionals to discuss advancements in neurosurgical practices and research, reinforcing Zagazig University's commitment to medical excellence.

Looking ahead, Zagazig University is set to be a hub for various international conferences in late 2024. These include the International Conference on Agricultural Tourism and Farming scheduled for October 21, which aims to explore the synergies between agriculture and tourism industries. Furthermore, in November and December, the university will host conferences on topics ranging from European law, vaccine policy, and interdisciplinary social sciences to distance learning, virtual education, and rural development.
